The ultimate in luxury AND INNOVATION.
An elegant blend of design, versatility and functionality.

WallDrain offers the ultimate in shower luxury and design innovation, pushing performance to its limit. It breaks the traditional rules of shower drain systems and goes beyond the limits of convention.

Because WallDrain is built into the wall instead of the floor surface, it offers a totally concealed and sleek look. You’ve never seen a drain like this before.
A more sophisticated shower solution.

Design is an integral part of the QuickDrain experience. Elegance and performance working together in tandem, a seamless blend of style and engineering.

More than a linear drain, QuickDrain is a sophisticated curbed or curbless total shower solution, full of refined detail.

Beautiful design is one thing. Pairing it with superior performance is another. Every engineering and design choice was intended to make QuickDrain as efficient as it is appealing.

- **ELEGANCE IN DESIGN**
  Open up a world of design possibilities.

- **EASY ACCESS DRAIN COVER**
  A series of magnets allow for simple removal and reattachment.

- **CLEAN LINES**
  Create a seamless visual flow within your bathroom.
Performance in curbless...

When QuickDrain is installed with a curbless entrance, it creates an easy, seamless transition from dry to wet areas in the bathroom.

**Universal Design & ADA Compliance**
The roll-in shower is a hallmark of universal design, making the shower easily accessible to all ages and abilities in accordance with the Americans with Disabilities Act. It also provides a clean and expansive look, from traditional to modern aesthetics.

**Improved Hygiene**
A curbless QuickDrain shower can be designed with larger format tiles, reducing the number of grout joints and seams where mold, mildew and grime can take hold.

**Flooring Options**
There are nearly limitless design options, as QuickDrain makes it possible to use nearly any imaginable finish or flooring material.
and curbed showers.

Shower curbs serve as the barrier between the shower pan and the rest of the bathroom floor. QuickDrain can offer an attractive solution in these scenarios.

**Versatile**
With QuickDrain, there’s no need to move plumbing or adjust the shower pan. QuickDrain can adapt to almost any existing plumbing condition.

**Showers Without an ADA Requirement**
When wheelchair accessibility is not necessary, QuickDrain installations with a curbed shower can give a bathroom a sense of separation from the rest of the room and help visually frame the shower area.

**Flexible Orientation**
QuickDrain can be placed in any orientation in the shower, just as long as it runs from wall to wall to effectively promote water drainage.
Simple installation.
Wall-to-wall coverage.

**One plane. No errors.**
Instead of a four-way compound slope toward the drain, the QuickDrain shower system requires only a one-directional slope. This improves drainage, giving water one uniform path toward the drain, minimizing installation errors.

**All in a matter of hours.**
Projects with a traditional mud bed and pan liner application require a minimum of two days of construction, waiting for mortar to set. The QuickSlope panel system can be completely installed in less than one day.

**Less labor.**
The QuickDrain system allows installers to move on to the next job quickly. The pre-sloped PET panels eliminate the need to float a pitched mud bed and wait for it to cure, saving big on labor cost.

**Complete Water Evacuation**
Whereas a traditional center drain requires a custom slope from a variety of directions, QuickDrain is situated parallel to the shower entry, creating a single flat surface, with stable and consistent flooring. And, the drain sits shallow enough in the subfloor, eliminating the need to recess the entire shower floor.

Most importantly, QuickDrain’s QuickFlow System creates wall-to-wall coverage and promotes the effective and efficient drainage of water.
The most complete in-wall linear drain system.

QuickDrain is a complete shower system that reimagines how a linear drain should perform and be installed. QuickDrain slashes construction time, saves on cost and minimizes impact on customers.

Example of WallDrain with Curbless Entry and Recessed Plywood Floor
Unmatched flexibility. Total customization.

No two shower installations are exactly alike, but QuickDrain can adapt to job site conditions, allowing installers to create an ideal shower for their customers.

WallDrain comes in the following lengths: 48" 72" 96"

• WallDrain kits can be trimmed onsite for convenient adjustability.

• Each WallDrain kit is available with either a vertical or a side (horizontal) waste outlet configuration.

• The WallDrain system is engineered to efficiently and effectively drain water from the shower.

Ordering WallDrain is fast & simple.

When you’re ready, you’ll contact your local QuickDrain USA dealer to place your order.

To make the ordering process seamless, complete the following simple steps to guide you through the process:

1. Verify structural integrity within shower footprint (level sub-floor and square framing).

2. Sketch the desired shower layout with measurements – include drain location and sub-floor material.

3. WallDrain Selection - Choose the following:
   a. Drain Body Length - 48", 72" or 96" according to what will fit into the space.
   b. Waste Outlet - vertical or side (horizontal) waste outlet configuration.
   c. For non-standard sizes, multi-waste outlets and more, QuickDrain can help you customize a drain body. Please contact us at info@quickdrainusa.com.

4. Waterproofing Accessories – WallDrain assembly kits include standard liquid waterproofing accessories necessary for a curbless application. Additional accessories can be purchased separately. The actual liquid will be supplied by the installer.

5. To make installation even easier, consider QuickDrain QuickSlope PET panels, available for both curbed and curbless applications.

For a complete list of QuickDrain parts, materials and design options, visit QuickDrainUSA.com or call 866.998.6685
As part of our commitment to minimize our environmental footprint, we use 100% recycled plastic bottles (Polyethylene Terephthalate or PET) to manufacture our QuickSlope shower panels. These non-reactive, economical and shatterproof parts do not degrade over time and perform even under the toughest conditions at 145 PSI.

If you’re looking to obtain LEED certification for your next project, please contact a QuickDrain representative to hear about our selection of environmentally conscious products, which may qualify for LEED points.

13 million+ Plastic Bottles Recycled
For every QuickDrain shower panel installed, 450 plastic bottles are saved from landfills – 13 million bottles and counting.

About QuickDrain USA and Oatey
Part of the Oatey family of brands, QuickDrain USA is a premier manufacturer of curbless and curbed shower solutions for showers and wet areas. Since 1916, Oatey has provided reliable, high-quality products for the residential and commercial plumbing industries. Today, Oatey operates a comprehensive manufacturing and distribution network to supply more than 6,000 products for professional builders, contractors, engineers and do-it-yourself consumers around the world. The company has successfully met customer needs for more than a century by offering innovative plumbing solutions that deliver results the first time. All Oatey products and brands are backed with the highest-quality technical and customer support programs in the industry.
POWER OF ONE

#1 in the industry. Oatey® is the number one source for purchasing the leading brands in the plumbing and home improvement industries.

One call does it all. Only Oatey brings you the plumbing industry’s best brands in one source. Making it easy to purchase any product across all our brands on one invoice, in one shipment.
